Dear Community,

The access codes to the [Auroville.org.in](https://auroville.org.in) domain name registration server were handed over to the Auroville Foundation office.

Using the access codes, the Auroville Foundation office have acquired access to our mail and other related services. This means that we are no longer aware of the security protocols used to secure your data.

We are looking into the matter and will update you.

Best regards,

Auroville Council and Working Committee
